

SOLUTION OVERVIEW

WASHINGTON SPEED SAFETY ZONES

• HOSPITALS | PUBLIC PARKS | SCHOOLS

Washington communities are now authorized to implement speed safety systems in the following locations.*

- **Hospital zones:** Speed enforcement that extends 300 feet from the border of a hospital.
- **Public park zones:** Speed enforcement that extends 300 feet from the border of a public park.
- **School zones and designated walk areas:** Speed enforcement in a school zone that extends a walking distance less than one mile from the school.

Turn your speed zones into safe zones with an effective, equitable automated enforcement solution that reduces speeding, maximizes resources, and keeps your community safe.

The Verra Mobility Safe Zone solution is an automated speed safety system that detects dangerous driving in authorized hospital zones, public park zones, school zones, and school walk areas.

When communities implement speed safety programs, drivers are encouraged to obey the speed limit in these vulnerable zones, enhancing pedestrian, bicyclist, and motorist safety.

*Speed enforcement authorization effective July 1, 2022 per SB5974, 2022 laws

VERRA
MOBILITY™

SPEED VIOLATIONS IN SAFETY ZONES

Speed safety programs comply with Washington state and local laws. A violation occurs when a motorist illegally drives over the posted speed limit in an authorized zone.

Automated enforcement increases adherence to speed laws, frees up officers, and enables communities to slow traffic when pedestrians and bicyclists are nearby.

Speed safety systems motivate drivers to be mindful of their speed, protecting the population from fatal crashes and severe injuries.

SAFE ZONE SOLUTION

We can help your community enhance safety by enforcing compliance for unlawful speeding in hospital zones, public park zones, school zones, and school walk areas.

HOW IT WORKS

Our automated speed safety system detects vehicles that unlawfully speed in an authorized zone during the specified hours of operation.

Upon detection, the system captures a full-color video of the event, including a high-resolution image of the license plate and all associated event data.

The end-to-end solution includes all hardware, software, and services required to adjudicate a violation successfully.

WHY VERRA MOBILITY

Select Washington's #1 safety camera provider and receive world-class support from a knowledgeable and trusted partner.

Connect with an organization that supports more speed safety cameras than any other vendor in the United States.

Work with a professional team that has been a collaborative, long-standing partner dedicated to public safety in Washington.
