

# HOW IT WORKS

## BUS LANE ENFORCEMENT SOLUTION

Automated photo enforcement systems monitor business access and transit lanes to detect vehicles that illegally use bus-only lanes.

- Step 1:** Automated photo enforcement systems detect vehicles that illegally access bus lanes. Bus lane usage is restricted to Metro buses, first responders and permitted vehicles.
- Step 2:** Event data is wirelessly uploaded via a secure Virtual Private Network (VPN) for processing and review.
- Step 3:** The Police Department reviews each bus lane event and determines the issuance of a citation. Once issued, a citation is mailed to the registered owner.
- Step 4:** Citation recipients can review bus lane violations via an online portal accessible via PIN number at [www.ViolationInfo.com](http://www.ViolationInfo.com).
