

HOW IT WORKS

SAFE SCHOOL ZONE SOLUTION

TURN YOUR SCHOOL ZONES INTO SAFE ZONES

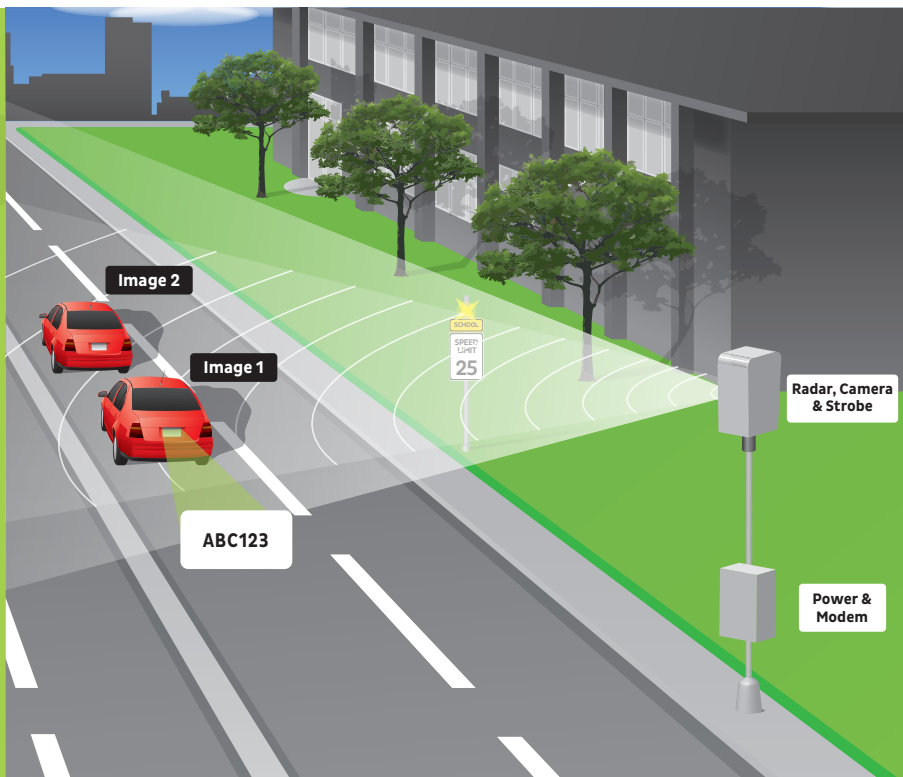

Step 1: The system identifies any vehicle traveling faster than the posted speed and triggers both the camera and video, which capture the event.

Step 2: The first image shows the vehicle driving in excess of the posted speed limit.

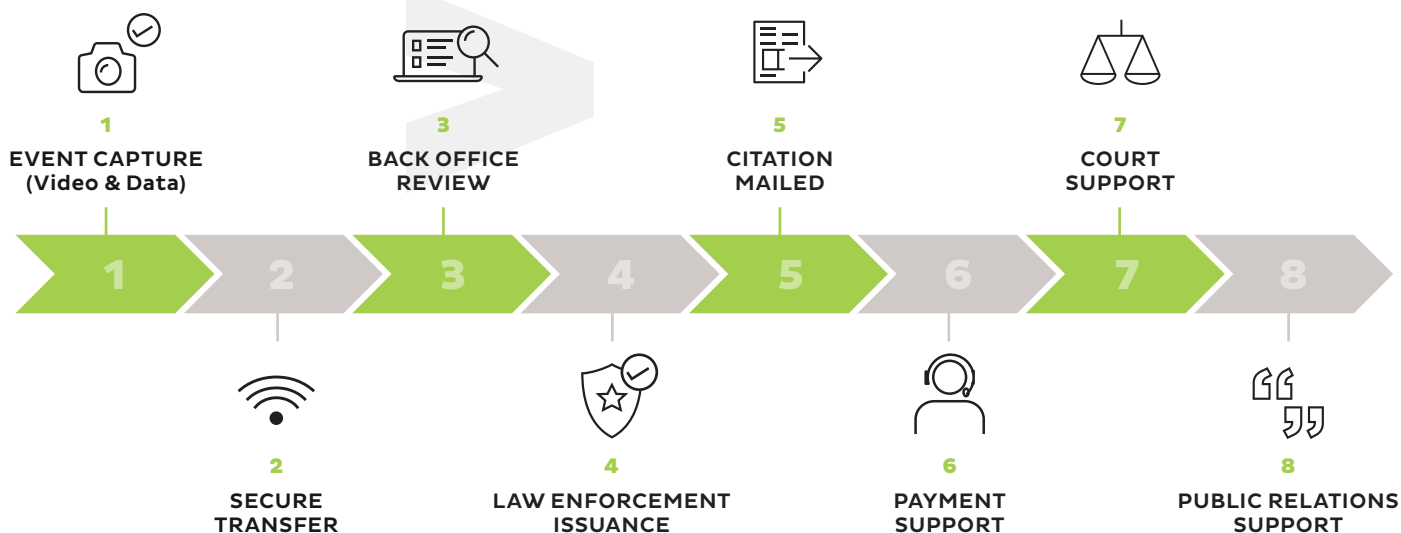

Step 3: The second image shows the distance and time the vehicle has traveled.

Step 4: The license plate image is cropped from one of the two still images captured.

Step 5: Data, including the time, date, posted speed, vehicle speed, location, lane, and direction of travel is collected.
