

SOLUTION OVERVIEW

WORK ZONE SPEED ENFORCEMENT

- **ENHANCE SAFETY**
- **MAXIMIZE RESOURCES**

As the number of fatal crashes in work zones increases, the need for better, safer work zone speed enforcement is a matter of life and death.

- Between 2018 and 2019, fatal crashes in work zones increased by 11 percent.¹
- In 2019, nearly one-quarter of all fatal work zone crashes involved rear-end collisions.¹

Work zone speed enforcement solutions can help to prevent these outcomes.

Turn your work zones into safe zones with an effective, equitable automated enforcement solution that reduces speeding, maximizes resources, and keeps construction crews safe.

The Verra Mobility Safe Work Zone solution provides communities with an automated speed safety camera system that detects dangerous driving in work zones.

Work zone speed enforcement encourages traffic compliance to reduce the average vehicle speed and rate of dangerous driving. When implemented, traffic slows before the work zone, enhancing motorist and construction crew safety.

WORK ZONE SPEED VIOLATIONS

Work zone speed safety camera programs are designed to comply with state and local laws. A violation occurs when a motorist illegally drives over the posted speed limit in a work zone.

Automated enforcement increases adherence to speed laws, frees up officers, and enables communities to slow traffic when construction crews are working.

Work zone enforcement motivates drivers to be mindful of their speed, protecting road crews from deadly crashes and severe injuries.

SAFE WORK ZONE SOLUTION

We can help your community enhance safety by enforcing compliance for unlawful speeding in designated work zones.

HOW IT WORKS

Our automated speed safety camera system detects vehicles that unlawfully speed in a work zone during the specified hours of operation.

Upon detection, the system captures a full-color video of the event, including a high-resolution image of the license plate and all associated event data.

The end-to-end solution includes all hardware, software, and services required to adjudicate a violation successfully.

WHY VERRA MOBILITY

Select a global leader in smart mobility technology and receive world-class support from a knowledgeable and trusted partner.

Connect with an organization that supports more speed safety cameras than any other vendor in the United States.

Work with a professional team that has been a collaborative, long-standing partner dedicated to public safety across the globe.
