

BUILDING SAFER STREETS

Government Solutions Corporate Profile

**VERRA
MOBILITY™**

**A GLOBAL
LEADER
IN SMART TRANSPORTATION**

VerraMobility.com/Government

Welcome

Verra Mobility is driven by a bold vision to create safer streets and healthier communities for everyone. From busy crosswalks and intersections to school buses and dedicated bus lanes, Verra Mobility makes every journey safer. Whether you're walking, driving, biking, or riding public transit, we're committed to helping community members feel confident that they'll arrive safely.

Real-world data proves it: Verra Mobility safety programs are transforming communities worldwide, improving driver behavior, reducing crashes, and ultimately saving lives. Road safety is not just what we do - it is our mission.

Verra Mobility safety programs have the potential to save millions of lives by preventing crashes before they happen.

Verra Mobility

Local governments face increasing pressure to keep streets safe, enforce laws fairly, and respond to evolving transportation challenges with limited resources.

Verra Mobility is a global leader in smart transportation technology, dedicated to building safer streets and healthier communities. In partnership with governments, law enforcement, and school districts, the organization delivers turnkey road safety programs backed by compliance, expert support, and public education to improve driver behavior, reduce crashes, and save lives.

With decades of operational expertise, industry credibility, and leading-edge technology, Verra Mobility simplifies complex traffic challenges by providing end-to-end, turnkey road safety programs. The safety organization manages the full process, from site permitting and installation to event processing and public outreach, allowing agencies to focus on core responsibilities.

Building Safer Streets

Verra Mobility solutions deliver consistent enforcement across all program types for unbiased enforcement and transparency.

Proven to reduce crashes and encourage responsible driving, our programs are being adopted by more cities every year to protect the public and support safer transportation.

Verra Mobility collaborates with local leaders and advocacy groups to shape programs that protect residents and reflect community priorities.

When lives are on the line, whether it's children riding school buses, commuters navigating intersections, or pedestrians near speeding vehicles, Verra Mobility delivers proven solutions that protect vulnerable road users and make travel safer for everyone.

As communities expand, Verra Mobility empowers agencies to deliver better mobility outcomes, boosting public transit reliability, reducing congestion, clearing paths for first responders, and ensuring equitable, efficient, and safe roadways.

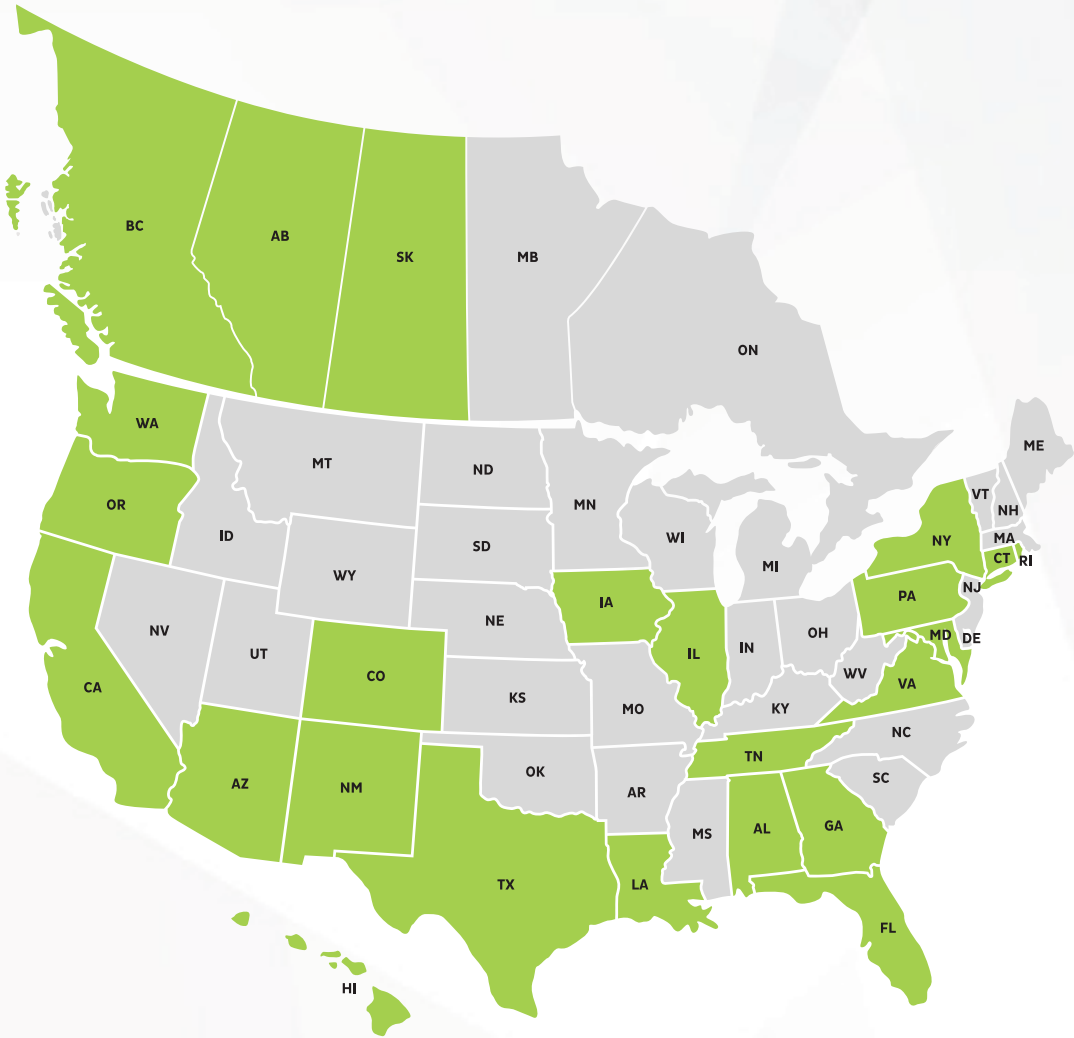

“By integrating automated enforcement tools and leveraging data to change driver behavior, Verra Mobility is helping cities make roads safer for pedestrians, cyclists, and drivers alike.”

Jon Baldwin,
*Executive Vice President,
Government Solutions*

Customer Success & Impact

Verra Mobility is proud to support 300+ clients across the globe with active North American speed, red-light, school bus stop-arm, and bus lane programs in 23 U.S. states and three Canadian provinces, including the five largest metropolitan speed programs in America.

The largest cities, including Baltimore, Calgary, Chicago, New York City, Philadelphia, San Francisco, Seattle, Tampa, Toronto, and Washington, D.C., have thoroughly vetted Verra Mobility and its road safety camera programs. The organization is committed to serving customers at their highest point of need.

Public Sectors

- Departments of Transportation
- Municipalities
- School Districts
- Transit Authorities

Use Cases

- Work Zones + Park Zones
- Intersections + Roadways
- School Zones + School Buses
- Transit Bus Lanes

Verra Mobility programs create safer, more reliable streets by reinforcing the rules that protect everyone. When drivers know that speeding, running red lights, or illegally passing school buses will be detected, dangerous behavior declines, and safer driving increases. The result is calmer traffic, greater compliance, and a stronger culture of responsibility on the road.

Clear bus lanes keep emergency responders moving quickly when every second counts. Better public transit times increase ridership. Protected crosswalks give pedestrians, cyclists, and other vulnerable road users safe, predictable space to move. By shaping behavior through automated enforcement and public education, communities reduce collisions, lessen the severity of crashes, and ultimately save lives.

Verra Mobility program results are more than just numbers, they represent safer streets, more mindful drivers, and a stronger commitment to community safety. Automated enforcement is not about fines and punishment; it's about education, deterrence, and creating lasting change.

School Bus Safety

98%

of drivers who receive a Stop Guard illegal passing violation do not receive a second.*

STOP-ARM

School Zone Safety

94%

reduction in speeding in New York City locations where cameras are installed.**

SPEED

Intersection Safety

86%

of drivers who receive a red light violation do not receive a second.*

Solving Traffic Challenges

SOLUTIONS

Verra Mobility is more than a vendor, it's a long-term partner to the public sector. Behind every deployment is a network of strategic coordination among city agencies, school districts, law enforcement, courts, and community partners. We work alongside stakeholders to ensure every safety program is compliant, community-focused, and aligned with established safety and mobility goals.

Verra Mobility provides a full-service ecosystem that enables agencies to launch, manage, and sustain safety programs confidently. From permitting to install, event review, customer service, court and payment support, training, and public education, Verra Mobility serves as a trusted advisor in every step of the journey.

65M+

Events Processed Annually with proven ability to scale, integrate with systems, and deliver prosecutable outcomes efficiently.

950+

Skilled Employees committed to safety, with extensive expertise in automated enforcement and program management.

30

Years' Experience delivering solutions that enhance safety, with a trusted, tested, and proven approach to every program.

VERRA
MOBILITY™

VerraMobility.com/Government

In today's fast-changing world of urban enforcement, integrated smart transportation solutions act as a powerful force multiplier, helping communities monitor, enforce, and adapt to evolving traffic conditions. Built for long-term flexibility, Verra Mobility safety programs feature AI-driven tools, scalable deployment options, and edge-based technology to keep agencies ahead of shifting laws, growing mobility demands, and emerging safety challenges.

SOLUTIONS

- Speed Safety Programs
- Stop Guard™ School Bus Safety Programs
- Red-Light Safety Programs
- Bus Lane Mobility Programs
- Block-the-Box Mobility Programs
- Noise Abatement Programs
- Restricted Lane Programs

SERVICES

- Installation & Maintenance
- Management & Training
- Event Processing & Citation Issuance
- Court & Payment Support
- Reporting & Program Data
- Software & Cybersecurity Support
- Public Education & Awareness

BUILDING SAFER STREETS

Why Verra Mobility

Trusted to run the world's largest and most complex safety programs, delivering scalable solutions that protect people every day.

Driven by collaboration that brings communities, advocacy groups, and local partners together to deliver impactful safety outcomes.

Recognized for decades of industry leadership, delivering compliant solutions that elevate performance and advance safety.

Committed to the highest security standards, trusted to protect data, privacy, and maintain safety program integrity.

Leading Technology

Verra Mobility continuously evolves its technology and services to meet the needs of modern transportation networks. By seamlessly integrating automated camera technologies, advanced AI, and a unified software platform, the organization provides customers with a comprehensive safety and mobility toolkit, ensuring efficient and streamlined smart transportation solutions.

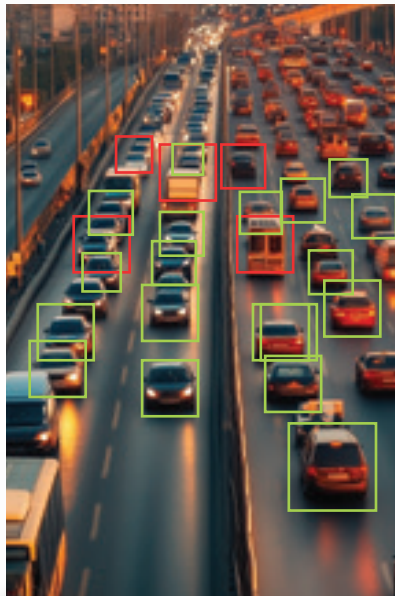

Software Defined Enforcement Solutions

Power programs with advanced intelligence and proven technology with software-defined systems that adapt through real-time OTA updates, delivering smarter, safer outcomes as your community's needs evolve.

Camera Capabilities

- Video-based plate recognition
- High-resolution images
- Integrated live & recorded video

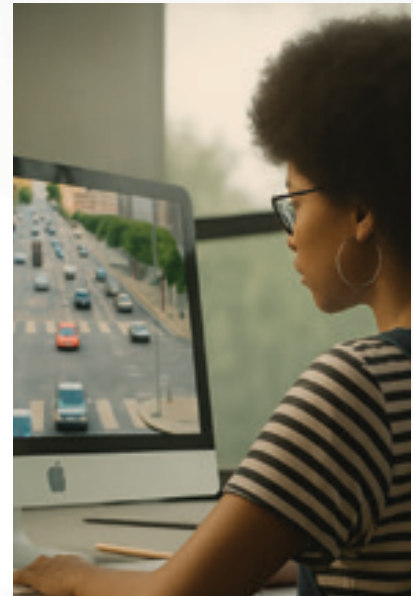

Artificial Intelligence Technologies

Leverage our intelligent software stack to drive autonomy and advance camera, sensor, and software capabilities for next-generation performance, adaptability, and the ability to solve evolving use cases.

AI Capabilities

- Machine learning
- Video analytics
- Adaptive algorithms

Enterprise Multi-Service Management System

Enable safety and mobility with enterprise-wide integration that connects hardware, software, and data into one intelligent network. The system enables seamless coordination across all solutions.

System Capabilities

- Centralized management
- Edge-based processing
- Real-time analytics

Smart Mobility Platform

At the heart of every Verra Mobility solution is a secure platform that powers the lifecycle of an event to a violation and beyond. The platform integrates seamlessly with DMV databases, law enforcement agencies, and court systems to ensure accurate case resolution and efficient adjudication.

Built with security and simplicity, the user interface offers a smooth, browser-based experience that makes processing effortless.

Platform Capabilities

- Multi-event processing
- Registered owner lookup
- Citation print & mail
- Payment processing & tracking
- Evidence package generation
- Hearing & adjudication support
- Statistical & operational reporting
- Correspondence management
- Data retention compliance
- Citizen services

Security Highlights

- SOC2 Type II
- Private network infrastructure
- CJIS compliant
- AES-256 encryption
- IPSEC VPN tunnels
- Annual third-party vulnerability assessment

Operated by some of the largest cities, DOTs, and school districts in the country, Verra Mobility's smart mobility platform transforms raw roadside data into actionable solutions that include evidence packages, prosecutable violations, reporting, analytics, citation mailing, court scheduling, payment facilitation, and more.

The platform integrates with DMV and related databases to retrieve owner registration data and applies quality assurance protocols to ensure accuracy. Authorized users can review citations remotely from any secure internet-connected device, with access permissions, encryption, and full audit trails in place to protect data integrity, chain of custody, and privacy.
